Digital Photo Frame

A396

The main characteristic of the aigo A396 Digital Photo Frame is the built-in MP3 player with speakers, which allow adding a music background to slideshows. The 6.5” frame displays high quality pictures and supports up to 10 mega pixel photos, which can be stored on the 32MB solid state memory or viewed from additional memory cards and even from some cameras, when connected via USB. The 16 transitions visual effect offers dynamic slideshows, which can be automatically set up through the user-friendly interface of the aigo A396. The modern and neutral design of the frame is easy to coordinate with any decoration, and the digital photo frame can be mounted on a wall or used as a desktop pictures display.

Share and enjoy all those images with friends and family

Set up slideshows with background music via the built in MP3 Player

Easy to use and compatible with a wide variety of memory cards
